

## What Is A 'Sexual Orientation'?

### **Gender Identity Disorders (page 576 in DSM-IV-TR)**

Homosexual and transgender activists claim that “gender identity” can be different from a person’s biological sex and is inborn. In other words, a man who thinks he’s a woman, should be free to change his sex; a woman who thinks

she's a man should be free to change her sex and be free of alleged "discrimination" in the workplace.

TVC's report, "A Gender Identity Disorder Goes Mainstream" explains how radical transgender activists are working to overthrow the idea that a person's biological sex is who they are – not what they think they are. Men are not women; women are not men. To think otherwise is to display evidence of a mental disorder and gender confusion. These conditions are treatable. They should not be normalized as "gender variant" behaviors.

TVC's report, "Sexual Orientation: Fixed Or Changeable" discusses the idea of sexual orientation being on a continuum that can change over time.

The *DSM* still lists transvestism and gender dysphoria (confusion over one's status as male or female) as mental problems to be dealt with by a psychiatrist.
